Objective

Aspiring Junior Web Developer with hands-on experience in full-stack web development. Eager to contribute technical expertise and creativity to build responsive and user-friendly web applications while gaining valuable industry experience.

Technical Skills

Front-End Development:

- Proficient in HTML5, CSS3, JavaScript, React, and Redux.
- Experience in responsive design and cross-browser compatibility.
- Skilled in transforming designs into interactive web pages.

Back-End Development:

- Experienced in Node.js, Express.js, and RESTful API development.
- Strong knowledge of authentication and web security best practices.
- Familiar with PostgreSQL for database management.

Testing and Debugging:

- Hands-on experience in front-end testing using tools like Jest and React Testing Library.
- Proficient in back-end testing, including API testing with tools like Postman and Supertest.
- Skilled in identifying and resolving bugs to ensure application reliability.

Version Control:

- Proficient in using Git for version control and collaboration.
 - Experienced in managing repositories and workflows on GitHub.
-

Professional Experience

Full-Stack Developer (Freelance)

- Built and deployed responsive web applications using React, Redux, and Node.js.
